Date: 22.03.2020

Dear Students,

Hope this mail finds you in good health and safe environment. I urge you to be at home, take precautions and make the most of this time, academically.

In the view of circular with ref no. VTU/PS/2020-21/10441 dated 13.03.2020 from Visvesvaraya Technological University, BMSCA has declared holidays to its students. However, it is very important that we utilize this time constructively so as not to get burdened towards the semester end after college resumes. This is the mid-semester time and we all know how important this time is for us academically.

Hence to maintain the schedule of subjects as per lesson plan, the faculty has decided to initiate online classes, starting from Monday, March 23rd, 2020. The classes will be scheduled as per timetable, through zoom.us app which can be accessed through desktops, laptops, tabs or smart phones.

For the theory sessions, the lecture component will be delivered by the faculty. The lectures will be recorded as well and made available through your class email id's to students who are genuinely in remote areas. Following the lecture, a quick assignment based on that lecture will be given for the students to do and submit on the same day itself, which needs to be submitted on that day itself before 9.00 PM. This will ensure the attendance for the students.

For theory + Studio based subjects, after the common lecture session, course material will be shared with students to make plates/ scaled sketches in their sketch books after every 45 mins, the faculty will log in and be available to solve any doubts that may arise. Last one hour of the class, the faculty will again be online with students to conclude the class.

For Architectural Design, the ten students guided by the faculty will meet as per timetable. Slots will be given to per students to discuss the design, progress and clarify doubts. A submission date and deliverable will be fixed for the week, which the student must submit online within given date and time. This will be evaluated.

All the submissions taken for all subjects will be evaluated and considered for CIE. Attendance will also be marked based on timely submission delivery.

The entire process is put in place to make it convenient for the students to keep updated academically so as not to feel pressurized in the end of the semester.

This is a sincere request to all students to co-operate and let's make it a successful semester despite of the current challenges. All the best to all and Do stay safe. Do report to your subject teachers / proctors for any issues. I assure that we, faculty and the college is with you through this, and expect the same in return.

Stay safe, stay at home.

Good luck!
